PROFILE

Aspiring and dedicated BCA student with a specialization in Artificial Intelligence and Machine Learning, driven by a passion for coding and problem-solving. Equipped with a solid foundation in computer science and hands-on experience in AI and ML technologies through academic projects and coursework. Eager to leverage my skills and knowledge to contribute to innovative development projects and grow as a professional web developer.

EXPERIENCE

- Code storm:36 hours hackathon
  - A 36 hour web development hackathon where participants were provided with real life projects to work on for 36 hours non stop.
- Amazon web services: workshop
  - A workshop for cloud computing where the students were introduced to cloud computing equipment and taught how to use them.

PROJECTS

- **Library Management System** using Python
- It streamlines the process of cataloging, managing, and tracking books, making it easier to handle large collection.

- Digital systems allow for remote access, enabling users to search for and reserve books online, especially useful for larger institutions .
- **Student Management System** using C programming language
  - A software program designed to automate and streamline the process of tracking student attendance.
- **Library Management System**-**web design**
  - The Front End design for Library Management System to make the experience of accessing library resources more convenient and easy.

ACHIEVEMENTS

Certificates:
- Code storm:36 hours hackathon
- Amazon web services: workshop
- MOOC on Cybersecurity and Data Analytics

Medals:
- Karate
- Dance
- Athletics
